II. Need, Rationale and Benefits of the Scheme of Amalgamation

Need and Rationale:

The Transferee Company is one of the leading global steel companies, with over 100 (hundred) years of experience in the steel sector and is a pioneer of steel manufacturing in India. The Transferor Company is engaged in the business of undertaking turnkey projects of material handling for the infrastructure sector and also in production of such material handling equipment. This amalgamation will consolidate the business of the Transferor Company and Transferee Company which will result in focused growth, operational efficiencies, and business synergies. In addition, resulting corporate holding structure will bring enhanced agility to the business ecosystem of the merged entity.

The Transferor Company and the Transferee Company believe that the resources of the merged entity can be pooled to unlock the opportunity for creating shareholder value.

The Transferor Company and the Transferee Company will be able to share best practices, cross-functional learnings, and utilize each other's facilities in a more efficient manner.

Benefits and Synergies of business of the Entities involved in the Scheme:

The Scheme would result in the following synergies:

- (a) **Operational efficiencies:** Centralized sourcing would result in procurement synergies and reduction in stores / spare through common inventory management. The proposed Scheme would also result in sharing of best practices, cross functional learnings, better utilisation of common facilities and greater efficiencies in debt and cash management.
- (b) **Simplified structure and management efficiency:** In line with group level 5S strategy – simplification, synergy, scale, sustainability, and speed – proposed Scheme will simplify group holding structure, improve agility to enable quicker decision making, eliminate administrative duplications, consequently reducing administrative costs of maintaining separate entities.
- (c) **Execution of projects in pipeline:** Existing facilities and expertise of Transferor Company will cater to demand for design and engineering services for industrial structure required in upcoming expansion projects of the Transferee Company.
- (d) **Sharing of best practices in sustainability, safety, health and environment:** Adoption of improved safety, environment and sustainability practices owing to a centralized committee at combined level to provide focused approach towards safety, environment and sustainability practices resulting in overall improvement. Further, overall technology maturity can be enhanced by the merged entity through unfettered access to each other's information technology applications and systems.

Cost Benefits of the Scheme

The implementation of the Scheme would involve incurring costs including administrative cost, statutory dues, cost of advisors, etc. However, the long-term benefits are expected to outweigh costs towards implementation of the Scheme.

XIII. Summary of the Valuation Report and Fairness Opinion

Background:

- a. The Share Exchange Ratio for the Scheme of Amalgamation has been fixed on the basis of the Valuation Report dated September 22, 2022 issued by CA Vikrant Jain, an Independent Chartered Accountant and Registered Valuer. The valuation has been done in accordance with internationally accepted valuation standards.
- b. The computation of fair Share Exchange Ratio is given below:

Valuation Approach	Tata Steel Limited		TRF Limited	
	Value (₹/ Share)	Weight	Value (₹/ Share)	Weight
Asset Approach – NAV Method	91.6	0%	0	0%
Income Approach – DCF Method	N/A	0%	N/A	0%
Market Approach – MP Method	106.6	50%	169.0	50%
Market Approach – CCM Method	107.4	50%	195.2	50%
Relative Value per Share	107.0		182.1	
Fair Exchange Ratio (rounded off)	1.7			

N/A = Not Applied

- c. In case of Net Assets Value (NAV) Method, the value is determined by dividing the net assets of the company by the number of shares. The underlying asset approach represents the value with reference to the historical cost of the assets owned by a company and attached liabilities as at the valuation date. Since, the business of Tata Steel Limited ('**Transferee Company//TSL**') and TRF Limited ('**Transferor Company//TRF**') are to be continued on a 'going concern basis' and there is no intention to dispose off the assets, therefore the Asset Approach has not been considered for the valuation exercise.
- d. The discounted cash flow (DCF) method of valuation which derives the valuation of an asset based on the expected future cash flows of those assets. The projected cash flows are discounted with the weighted average cost of capital to arrive at the value. In the given transaction, the Transferee Company and the Transferor Company have a proven track record of operations, revenues and/or profitability and besides their own share prices, there are adequate number of comparable/benchmark listed companies which enable a valuation analysis based on the market approach using assets and/or earnings multiples, obviating the need for using the Income Approach. Therefore, for the valuation analysis, Income Approach has not been considered.
- e. Valuation under market price method has been arrived at basis higher of 90 trading days volume weighted average price or 10 trading days volume weighted average price in accordance with the SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018.
- f. Under comparable companies multiple (CCM) method, the value of the equity shares of a company is determined on the basis of multiples derived from valuations of comparable companies. Following set of companies have been considered basis the sector, similarity in business/ product and size of the company in terms of market capitalization, operating revenue etc.:

2.	Steel Authority of India Ltd
3.	Tata Steel Limited

For Transferor Company:

1.	Firstsource Solutions Ltd
2.	Datamatics Global Services Ltd
3.	Zensar Technologies Ltd
4.	Cigniti Technologies Ltd
