B. Annual report

Summary of the most important principles for valuation and determination of results

General

The financial statement has been drafted conform the generally accepted accounting principles for determination of results in The Netherlands, as determined in Part 9, Book 2 of the Civil Code.

The financial statement has been drafted on basis of the historical cost price. Unless otherwise indicated, have the assets and liabilities been valued against nominal value.

Foreign currency

Balance values in foreign currency are converted against the exchange rates that prevailed at the balance sheet date.

In the profit and loss statement the assets and liabilities in foreign currencies are converted with the average rates.

Where currency hedging agreements were entered into, the conversion takes place using the rates set out in these agreements.

Rate differences that arise from transactions that are associated with business activities are credited or charged to the operating result. Other rate differences – to include long-term claims and liabilities – are justified under the financial assets and liabilities.

Rate differences that arise from the conversion of the capital values of the foreign associations are justified in favour of or charged to the equity.

This also applies to rate differences on loans that are intended to cover the currency risk on foreign associations and rate differences on loans to or from foreign associations that can be considered as increased, respectively reduced investment in the association.

Investments in fixed assets

Tangible fixed assets are valued at purchase price less depreciation. Every year, 2% of the depreciated historical cost.

Claims

Receivables are claims after deduction of provisions for doubtful debtors.

Debts

Debts that expire within one year are marked as short-term.

Taxes

With the calculation of the taxes over the profit or loss and over direct mutations in the reserves, the actual tax tariffs are assumed. The difference between the tax amounts calculated in this manner and the tax amounts on basis of the calculation of the result conform the tax-code is entered on the Balance sheet as a latent tax liability or asset (in accordance with the period-allocation method).

In general no provisions are entered into the Balance sheet for deferred tax liabilities related to land and interest in subsidiaries and related companies. Deferred tax liabilities are not activated if there is insufficient certainty that these will be compensated in the future.

B. Annual report
