TATA STEEL (THAILAND) PUBLIC COMPANY LIMITED

CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS 31 MARCH 2023

Independent Auditor's Report

To the shareholders and the Board of Directors of Tata Steel (Thailand) Public Company Limited

My opinion

In my opinion, the consolidated financial statements and the separate financial statements present fairly, in all material respects, the consolidated financial position of Tata Steel (Thailand) Public Company Limited (the Company) and its subsidiaries (the Group) and the separate financial position of the Company as at 31 March 2023, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRS).

What I have audited

The consolidated financial statements and the separate financial statements comprise:

- the consolidated and separate statements of financial position as at 31 March 2023;
- the consolidated and separate statements of comprehensive income for the year then ended;
- the consolidated and separate statements of changes in equity for the year then ended;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes to the consolidated and separate financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated and separate financial statements section of my report. I am independent of the Group and the Company in accordance with the Code of Ethics for Professional Accountants including Independence Standards issued by the Federation of Accounting Professions (TFAC Code) that are relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with the TFAC Code. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key audit matters

Key audit matters are those matters that, in my professional judgement, were of most significance in my audit of the consolidated and separate financial statements of the current period. I determine one key audit matter: Assessment of impairment of investments in a subsidiary and goodwill. The matter was addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on this matter.

Key audit matter

How my audit addressed the key audit matter

Assessment of impairment of investments in a subsidiary and goodwill

Note No. 7 to the financial statements relates to critical accounting estimates and judgements related to the assessment of impairment of investments in a subsidiary and goodwill, Note 14 investments in a subsidiary and Note 18 goodwill.

As at 31 March 2023, investments in a subsidiary, net, in the amount of Baht 12,013 million were presented in the separate financial statements, and, goodwill, net, in the amount of Baht 3,456 million was presented in the consolidated financial statements.

For the year ended 31 March 2023, the management performed an impairment assessment over the investments in a subsidiary and the goodwill balances by:

- Calculating the discounted cash flow using a discounted cash flow model for 5 years, with constant terminal growth rate applied from the 5th year onwards. These cash flows were then discounted to net present value using the weighted average cost of capital; and
- Comparing the discounted cash flow to their respective book values of each cash generating unit. The discounted cash flow of each cash generating unit was used to assess for allowance for impairment of investments in a subsidiary and goodwill of each cash generating unit.

Based on the annual impairment test, the management identified no additional allowance for impairment of the investments in a subsidiary and goodwill was required. The key assumptions used in were disclosed in Note 18 to the financial statements.

I focused on this area because the balances of these accounts were material to the financial statements. Moreover, the assessment of the recognition of loss from impairment in the investments in a subsidiary and goodwill were complex based on judgements and assumptions that are affected by expectation of future market and economic conditions, particularly those related to the cash flows forecasts. I obtained an understanding of and evaluated the key controls over the impairment assessment, and tested recoverable amount of investment in a subsidiary and goodwill prepared by management in conducting the impairment assessment which included:

- I obtained, understood, evaluated and challenged the composition of management's cash flow forecasts and the process by which they were developed, including test the mathematical accuracy of the underlying calculations.
- I compared the cash flow forecast to the approved budgets and business plans and other evidence of future intentions.
- I compared current year actual results with the figures included in the prior year forecast to consider whether the forecasts included assumptions had been reasonable.
- I assessed management's key assumptions, especially gross margin and growth rate by comparing them to historical results and economic and industry outlook.
- I tested the parameters used to determine the discount rate applied and re-performed the calculations.
- I involved a valuation expert to independently check the expectations, in particular, discount rates, and comparing the independent expectations to those used by management.

Based on a procedures above, I considered management's key assumptions used in assessing of investments in a subsidiary and goodwill for impairment were reasonable based on available evidence.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated and separate financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein, I am required to communicate the matter to the audit committee.

Responsibilities of the directors for the consolidated and separate financial statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRS, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Group's and the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated and separate financial statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of
 the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the audit committee with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1 General information

Tata Steel (Thailand) Public Company Limited ("the Company") is a public limited company which is incorporated and domiciled in Thailand and is listed on the Stock Exchange of Thailand since November 2002 with the objective to invest in other companies and provide management services. The address of the Company's registered office is as follows:

Rasa Tower 2, 20th Floor, 555 Phaholyothin Road, Chatuchak Sub-district, Chatuchak District, Bangkok 10900.

For reporting purposes, the Company and its subsidiary are referred to as "the Group".

The principal business operation of the Group is manufacturing, rendering manufacturing services, distributing and trading of steel bars, wire rods and small section products.

The major shareholder is T S Global Holdings Pte. Ltd. ("TSGH"), which is incorporated in Singapore and holds 67.90% of the Company's shares, and is an affiliate of Tata Steel Limited, a listed company incorporated under the law of India.

The Company has not recorded an investment in Siam Steel Mill Services Company Limited which is held by Tata Steel Manufacturing (Thailand) Public Company Limited for 24% of share capital using the equity method because the Company does not have significant influence to govern the financial and operating policies of and does not have any authorised director to sign on behalf of Siam Steel Mill Services Company Limited.

The Company had issued warrants on 2 December 2002 with the maturity term as 10 years from the issue date. As per the terms of the warrants, if any warrants had not been exercised within the specified period, such warrants would be cancelled. On 3 December 2012, the warrants which were not exercised within the specified period, had expired. Accordingly, the Company had recorded the expired warrants of Baht 130 million as Share premium in the statement of financial position as at 31 March 2013.

These consolidated and separate financial statements were authorized for issue by the Board of Directors on 18 April 2023.

2 Basis of preparation

The consolidated and separate financial statements have been prepared in accordance with Thai Financial Reporting Standards ("TFRS") and the financial reporting requirements under the Securities and Exchange Act.

The consolidated and separate financial statements have been prepared under the historical cost convention except as disclosed in accounting policies for certain financial assets (including derivative instrument) as described in Note 4.7 and certain financial liabilities as described in Notes 4.13.

The preparation of financial statements is in conformity with TFRS requires management to use certain critical accounting estimates and to exercise its judgement in applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas that are more likely to be materially adjusted due to changes in estimates and assumptions are disclosed in Note 7.

An English version of the consolidated and separate financial statements have been prepared from the statutory financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

3 New and amended financial reporting standards

- 3.1 New and amended financial reporting standards that are effective for accounting period beginning on or after 1 January 2022 and relate to the Group
 - a) Revised Interest rate benchmark (IBOR) reform phase 2, amendments to TFRS 9, TFRS 7, TFRS 16 and TFRS 4, and accounting guidance, financial instruments and disclosures for insurance business provide relief measures addressing issues that might affect financial reporting during the reform, including the effects of changes to contractual cash flows or hedging relationship arising from the replacement of one benchmark with an alternative benchmark.

Key relief measures of the phase 2 amendments are as follows:

- When changing the basis for determining contractual cash flows for financial assets and financial liabilities (including lease liabilities), changes that are necessary as a direct result of the IBOR reform and which are considered economically equivalent, will not result in an immediate gain or loss in the income statement. TFRS 16 has also been amended to require lessees to use a similar practical expedient when accounting for lease modifications that change the basis for determining future lease payments as a result of the IBOR reform.
- Hedge accounting relief measures will allow most TFRS 9 hedge relationships that are directly
 affected by the IBOR reform to continue. However, additional ineffectiveness might need to be
 recorded.

TFRS 7 requires additional disclosure about:

- the nature and extent of risks arising from the IBOR reform to which the entity is exposed to
- how the entity manages those risks
- the entity's progress in transitioning from the IBOR to alternative benchmark rates and how the entity is managing this transition.

b) Accounting guidance on temporary relief measures for entities assisting debtors affected by the COVID-19 pandemic

The Group which assists debtors affected by the COVID-19 pandemic can apply the accounting guidance announced by TFAC based on BOT circular For. Nor. Sor 2. Wor. 802/2564 to help debtors between 1 January 2022 and 31 December 2023. The key relief measures involve, for example, the consideration for debt staging for ECL calculation where there is debt restructuring, revising EIR for the restructured debt and ECL calculation regarding unused credit line.

These financial reporting standards do not have the significant impact to the Group.

3.2 New and amended financial reporting standards that are effective for accounting period beginning on or after 1 January 2023 and relate to the Group

Certain amended TFRSs have been issued that are not mandatory for the current reporting period and have not been early adopted by the Group.

- a) Amendment to TAS 16 Property, plant and equipment clarified to prohibit entities from deducting from the cost of an item of PP&E any proceeds received from selling any items produced while the entity is preparing that asset for its intended use.
- b) Amendment to TAS 37 Provisions, contingent liabilities and contingent assets clarified that, in considering whether a contract is onerous, the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to fulfilling the contract. Before recognising a separate provision for an onerous contract, the entity must recognise any impairment losses that have occurred on the assets used in fulfilling the contract.
- c) Amendment to TFRS 3 Business combinations clarified some minor amendments to update its references to the Conceptual Framework for Financial Reporting and added a consideration for the recognition of liabilities and contingent liabilities acquired from business combinations. The amendments also confirmed that contingent assets shouldn't be recognised at the acquisition date.
- d) Amendment to TFRS 9 Financial Instruments clarified which fees should be included in the 10% test for the derecognition of financial liabilities. It should only include fees between the borrower and lender.

The Group's management is currently assessing the impact of initial adoption of these amended standards.

4 Accounting policies

4.1 Principles of consolidation

a) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control is transferred to the Group until the date that control ceases.

In the separate financial statements, investments in subsidiaries are accounted for using cost. Cost also includes direct attributable costs of investment.

b) Intercompany transactions on consolidation

Intra-group transactions, balances and unrealised gains on transactions are eliminated. Unrealised gains on transactions between the Group and its associates and joint ventures, if any are eliminated to the extent of the Group's interest in the associates and joint ventures. Unrealised losses are also eliminated in the same manner unless the transaction provides evidence of an impairment of the asset transferred.

4.2 Business combination

The Group applies the acquisition method to account for business combinations with an exception on business combination under common control. The consideration transferred for the acquisition of a subsidiary comprises.

- fair value of the assets transferred,
- liabilities incurred to the former owners of the acquiree
- equity interests issued by the Group

Identifiable assets and liabilities acquired and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

On an acquisition-by-acquisition basis, the Group initially recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The excess of the consideration transferred, the amount of any non-controlling interest recognised and the acquisition-date fair value of any previous equity interest in the acquiree (for business combination achieved in stages) over the fair value of the identifiable net assets acquired is recorded as goodwill. In the case of a bargain purchase, the difference is recognised directly in profit or loss.

Acquisition-related cost

Acquisition-related cost are recognised as expenses in consolidated financial statements.

Step-up acquisition

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measured are recognised in profit or loss.

Changes in fair value of contingent consideration paid/received

Subsequent changes to the fair value of the contingent consideration that is an asset or liability is recognised in profit or loss. Contingent consideration that is classified as equity is not re-measured.

Business combination under common control

The Group accounts for business combination under common control by measuring acquired assets and liabilities of the acquiree at their carrying values presented in the highest level of the consolidation. The Group retrospectively adjusted the business combination under common control transactions as if the combination had occurred on the later of the beginning of the preceding comparative period and the date the acquiree has become under common control.

Consideration of business combination under common control are the aggregated amount of fair value of assets transferred, liabilities incurred and equity instruments issued by the acquirer at the date of which the exchange in control occurs.

The difference between consideration under business combination under common control and the acquirer's interests in the carrying value of the acquiree is presented as "surplus arising from business combination under common control" in equity and is derecognised when the investment is disposed of by transferred to retained earnings.

4.3 Foreign currency translation

a) Functional and presentation currency

The financial statements are presented in Thai Baht, which is the Company's and the Group's functional and presentation currency.

b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or the date of revaluation where items are re-measured.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognised in profit and loss, any exchange component of that gain or loss is recognised in profit or loss.

4.4 Cash and cash equivalents

In the statements of cash flows, cash and cash equivalents includes cash on hand, deposits held at call, short-term highly liquid investments with maturities of three months or less from acquisition date and bank overdrafts.

In the statements of financial position, bank overdrafts are shown in current liabilities.

4.5 Trade accounts receivable

Trade receivables are amounts due from customers for goods sold and service performed in the ordinary course of business. They are generally due for settlement within 10 days to 90 days and therefore are all classified as current.

Trade receivables are recognised initially at the amount of consideration that is unconditionally unless they contain significant financing components, when they are recognised at its present value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost.

The impairment of trade receivables are disclosed in Note 4.7 f).

4.6 Inventories

Inventories are stated at the lower of cost and net realisable value .

Cost is determined by the weighted average method for finished goods and work in process and by the moving average method for merchandise, raw materials, spare parts, supplies and others. Cost of raw materials comprise all purchase cost and costs directly attributable to the acquisition of the inventory less all attributable discounts. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and directly attributable costs in bringing the inventories to their present location and condition.

4.7 Financial asset

a) Classification

The Group classifies its debt instrument financial assets in the following measurement categories depending on i) business model for managing the asset and ii) the cash flow characteristics of the asset whether they represent solely payments of principal and interest (SPPI).

- those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- those to be measured at amortised cost.

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

For investments in equity instruments, the Group has an irrevocable election at the time of initial recognition to account for the equity investment at fair value through profit or loss (FVPL) or at fair value through other comprehensive income (FVOCI) except those that are held for trading, they are measured at FVPL.

b) Recognition and derecognition

Regular way purchases, acquisitions, and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

c) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether the cash flows are solely payment of principal and interest.

d) Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the financial assets. There are three measurement categories into which the Group classifies its debt instruments:

- Amortised cost: Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in other income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains/(losses). Impairment losses are presented as administrative expenses.
- Fair value through other comprehensive income (FVOCI): Financial assets that are held for i) collection of contractual cash flows; and ii) for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through other comprehensive income (OCI), expect for the recognition of impairment gains or losses, interest income using the effective interest method, and foreign exchange gains and losses which are recognised in profit or loss. When the financial assets is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income is included in other income. Impairment expenses are presented separately in the statement of comprehensive income.
- Fair value through profit or loss (FVPL): Financial assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

e) Equity instruments

The Group measures all equity investments at fair value. Where the Group has elected to present fair value gains and losses on equity instruments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other gains/(losses) in the statement of comprehensive income.

Impairment losses (and reversal of impairment losses) on equity investments are reported together with changes in fair value.

f) Impairment

The Group applies the TFRS 9 simplified approach in measuring the impairment of trade receivables, which applies lifetime credit loss, from initial recognition, for all trade receivables.

To measure the expected credit losses, trade receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due. The expected credit loss rates are based on payment profiles, historical credit losses as well as forward-looking information and factors that may affect the ability of the customers to settle the outstanding balances.

For other financial assets carried at amortised cost and FVOCI, the Group applies TFRS 9 general approach in measuring the impairment of those financial assets. Under the general approach, the 12-month or the lifetime expected credit loss is applied depending on whether there has been a significant increase in credit risk since the initial recognition.

The significant increase in credit risk (from initial recognition) assessment is performed every end of reporting period by comparing i) expected risk of default as of the reporting date and ii) estimated risk of default on the date of initial recognition.

The Group assesses expected credit loss by taking into consideration forward-looking information and past experiences. The expected credit loss is a probability-weighted estimate of credit losses (probability-weighted present value of estimated cash shortfall). The cash shortfall is the difference between all contractual cash flows that are due to the Group and all cash flows expected to receive, discounted at the original effective interest rate.

When measuring expected credit losses, the Group reflects the following:

- probability-weighted estimated uncollectible amounts
- time value of money; and
- supportable and reasonable information as of the reporting date about past experience, current conditions and forecasts of future situations.

Impairment (and reversal of impairment) losses are recognised in profit or loss and included in administrative expenses.

4.8 Property, plant and equipment

All other property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the item will flow to the Group. Capitalised where there is future economic benefits. The carrying amount of the replaced part is derecognised.

All other repairs and maintenance are charged to profit or loss when incurred.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost and the revalued amount to their residual values over their estimated useful lives, as follows:

| Land improvement, buildings and structures | 5 - 30 years |
|--|--------------|
| Machinery and equipment | 5 - 25 years |
| Furniture, fixtures and office equipment | 3 - 25 years |
| Vehicles | 5 - 10 years |

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Gains or losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in other gain or loss, net.

4.9 Goodwill

Goodwill is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses.

For the purpose of impairment testing, goodwill is allocated to cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, being each factory.

4.10 Intangible assets

Acquired computer software

Acquired computer software is measured at cost. These costs are amortised over their estimated useful lives, not exceeding a period of 3 years to 10 years.

Cost associated with maintaining computer software are recognised as an expense as incurred.

4.11 Impairment of assets

Assets that have an indefinite useful life are tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired. Assets that are subject to amortisation are reviewed for impairment whenever there is an indication of impairment. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use.

Where the reasons for previously recognised impairments no longer exist, the impairment losses on the assets concerned other than goodwill is reversed.

4.12 Leases

Leases - where the Group is the lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT-equipment and small items of office furniture.

4.13 Financial liabilities

a) Classification

Financial instruments issued by the Group are classified as either financial liabilities or equity securities by considering contractual obligations.

- Where the Group has an unconditional contractual obligation to deliver cash or another financial asset to another entity, it is considered a financial liability unless there is a predetermined or possible settlement for a fixed amount of cash in exchange of a fixed number of the Group's own equity instruments.
- Where the Group has no contractual obligation or has an unconditional right to avoid delivering cash or another financial asset in settlement of the obligation, it is considered an equity instrument.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

b) Measurement

Financial liabilities are initially recognised at fair value and are subsequently measured at amortised cost.

c) Derecognition and modification

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled, or expired.

Where the terms of a financial liability are renegotiated/modified, the Group assesses whether the renegotiation / modification results in the derecognition of that financial liability. Where the modification results in an extinguishment, the new financial liability is recognised based on fair value of its obligation. The remaining carrying amount of financial liability is derecognised. The difference as well as proceed paid is recognised as other gains/(losses) in profit or loss.

Where the modification does not result in the derecognition of the financial liability, the carrying amount of the financial liability is recalculated as the present value of the renegotiated / modified contractual cash flows discounted at its original effective interest rate. The difference is recognised in other gains/(losses) in profit or loss.

4.14 Borrowing costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets (assets that take 12 months to get ready for its intended use or sale) are added to the cost of those assets less investment income earned from those specific borrowings. The capitalisation of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

Other borrowing costs are expensed in the period in which they are incurred.

4.15 Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current tax

The current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax

Deferred income tax is recognised on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not recognised for temporary differences arise from:

- initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit or loss is not recognised
- investments in a subsidiary, associates and joint arrangements where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax is measured using tax rates of the period in which temporary difference is expected to be reversed, based on tax rates and laws that have been enacted or substantially enacted by the end of the reporting period.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

4.16 Employee benefits

a) Short-term employee benefits

Liabilities for short-term employee benefits such as salaries, wages, bonuses, contributions to the social security fund and others, that are expected to be settled wholly within 12 months after the end of the period are recognised in respect of employees' service up to the end of the reporting period. They are measured at the amount expected to be paid.

b) Defined contribution plan

The Group pays contributions to a separate fund (under the Provident Fund Act). The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due.

c) Defined benefit plans

Amount of retirement benefits is defined by the agreed benefits the employees will receive after the completion of employment. It usually depends on factors such as age, years of service and an employee's latest compensation at retirement.

The defined benefit obligation is calculated annually by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using market yield of government bonds that matches the terms and currency of the expected cash outflows.

Remeasurement gains and losses are recognised directly to other comprehensive income in the period in which they arise. They are presented as a separate item in statements of changes in equity.

Past-service costs are recognised immediately in profit or loss.

d) Other long-term benefits

The Group gives gold rewards to employees when they have worked for the Group at every 5 years anniversary, for a maximum of 7 times.

These obligations are measured similar to defined benefit plans except remeasurement gains and losses that are charged to profit or loss.

e) Termination benefits

The Group recognises termination benefits at the earlier of (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for the related restructuring. Benefits due more than 12 months are discounted to their present value.

4.17 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation. The increase in the provision due to passage of time is recognised as interest expense.

4.18 Share capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options (net of tax) are shown as a deduction in equity.

4.19 Revenue recognition

Revenue include all revenues from ordinary business activities. All ancillary income in connection with the delivery of goods and rendering of services in the course of the Group's ordinary activities is also presented as revenue.

Revenue are recorded net of value added tax. They are recognised in accordance with the provision of goods or services, provided that collectability of the consideration is probable.

Multiple element arrangements involving delivery or provision of multiple products or services are separated into distinct performance obligations. Total transaction price of the bundled contract is allocated to each performance obligation based on their relative standalone selling prices or estimated standalone selling prices. Each performance obligation is recognised as revenue on fulfillment of the obligation to the customer.

Sale of goods

The Group manufactures and sells products. Sales are recognised when control of the products has transferred, being when the products are delivered, and there is no unfulfilled obligation that could affect the buyer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the buyer, and either the buyer has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed, or the Group has objective evidence that all criteria for acceptance have been satisfied.

The product is often sold with retrospective volume discounts based on aggregate sales over a 12 month period. Revenue from these sales is recognised based on the price specified in the contract, net of the estimated volume discounts. Accumulated experience is used to estimate and provide for the discounts, using the expected value method, and revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. A refund liability (included in trade and other payables) is recognised for expected volume discounts payable to customers in relation to sales made until the end of the reporting period. No significant element of financing is deemed present as the sales are made with a credit term of 10 to 90 days, which is consistent with market practice.

The Group's obligation to repair or replace faulty products under the standard warranty terms is recognised as a provision and cost of sales.

A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

Services

The Group recognised service contracts with a continuous service provision as revenue on a straight-line basis over the contract term, regardless of the payment pattern.

Payments to customers

Payments to customers or on behalf of customers to other parties, including credited or subsequent discounts, are recognised as a reduction in revenue unless the payment constitutes consideration of a distinct goods or service from the customer.

Financing components

The Group does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Group does not adjust any of the transaction prices for the time value of money.

Other income

Other revenue are recognised on the following bases:

- dividend income is recognised when the right to receive payment is established.
- interest income is recognised on a time proportion basis, taking account of the principal outstanding and the effective rate over the period to maturity, when it is determined that such income will accrue to the group.
- scrap income is recognised when the scrap is actually sold.

4.20 Dividend distribution

Dividend distributed to the Company's shareholders is recognised as a liability when interim dividends are approved by the Board of Directors, and when the annual dividends are approved by the shareholders.

4.21 Derivatives and hedging activities

Derivatives that do not qualify for hedge accounting is initially recognised at fair value. Changes in the fair value are included in other income/other expenses.

Fair value of derivatives is classified as a current or non-current following its remaining maturity.

5 Financial risk management

5.1 Financial risk factors

The Group exposes to a variety of financial risk: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to hedge certain exposures.

Financial risk management is carried out by the Group Treasury Committee. The Group's policy includes areas such as foreign exchange risk, interest rate risk, credit risk and liquidity risk. The framework parameters are approved by the Board of Directors and uses as the key communication and control tools for Treasury team.

5.1.1 Market risk

a) Foreign exchange risk

The Group operates internationally and is exposed to foreign currency risk arising from US Dollar, Euro and Rupee India from trading transactions that are denominated in foreign currencies. The Group uses forward contracts, transacted with the financial institutions, to hedge their exposure to foreign currency risk of transactions in foreign currency.

The Group does not apply hedge accounting. The foreign currency forwards accounted for as held for trading, with gains (losses) recognised in profit or loss.

Exposure

The Group's and the Company's exposure to foreign currency risk at the end of the reporting period, expressed in Baht are as follows:

| | | | | | ted financial | | | | |

Sensitivity

As shown in the table above, the Group is primarily exposed to changes in Baht and US Dollar, EURO and Rupee India exchange rates. The sensitivity of profit or loss to changes in the exchange rates arises mainly from financial assets and financial liabilities denominated in US Dollar, EURO and Rupee India.

| | Consolidated financial statements | | | |

b) Cash flow and fair value interest rate risk

The Group's income and operating cash flows are substantially independent of changes in market interest rates. The Group has no significant interest-bearing assets. Therefore, the management believe that effect of interest rate fluctuation will not materially affect the Group.

Significant financial assets and liabilities classified by type of interest rates are summarised in the table below.

| | | | | Consolidate | d financial stat | ements | | | |

5.1.2 Credit risk

Credit risk arises from cash and cash equivalents, derivative financial instruments as well as credit exposures to customers, including outstanding receivables.

a) Risk management

Credit risk is managed on a group basis. For banks and financial institutions, only independently rated parties with a minimum rating of 'A' are accepted.

If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on tips and assessments in accordance with limits set by the board. The compliance with credit limits by customers is regularly monitored by line management.

The Group has no significant concentrations of credit risk. The Group has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history.

b) Security

The Group may obtain security in the form of guarantees or letters of credit which can be called upon if the counterparty is in default under the terms of the agreement.

c) Impairment of financial assets

The Group and the Company has 3 types of financial assets that are subject to the expected credit loss model:

- Cash and cash equivalents
- Trade and other receivables
- Loan to a subsidiary

While cash and cash equivalents is also subject to the impairment requirements of TFRS 9, the identified impairment loss was immaterial.

Trade receivables

The Group applies the TFRS 9 simplified approach to measure expected credit losses which uses a lifetime expected loss allowance for all trade receivables.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due.

The expected loss rates are based on the payment profiles of sales over a period of 36 month, respectively and the corresponding historical credit losses experienced within this period.

On that basis, the loss allowance was determined as follows for trade receivables:

| | Consolidated financial statements | | | | | | | | |
|--|-----------------------------------|---------------------------------------|-------------------------------------|--------------------------------------|---------------------------------------|---------------------------|--|--|--|
| | Current Thousand Baht | Up to 3 months Thousand Baht | 3 - 6 months Thousand Baht | 6 - 12 months Thousand Baht | Over 12 months Thousand Baht | Total Thousand Baht | | | |
| 31 March 2023 Gross carrying amount - trade receivables | 2,652,978 | 169,264 | - | - | 78,982 | 2,901,224 | | | |
| Loss allowance | | - | - | - | (78,982) | (78,982) | | | |
| 31 March 2022 Gross carrying amount - trade receivables | 2,166,681 | 246,270 | - | - | 78,982 | 2,491,933 | | | |
| Loss allowance | | - | - | - | (78,982) | (78,982) | | | |

| | | Separate financial statements | | | | | |
|--|-----------------------------|---------------------------------------|-------------------------------------|--------------------------------------|---------------------------------------|---------------------------|--|
| | Current Thousand Baht | Up to 3 months Thousand Baht | 3 - 6 months Thousand Baht | 6 - 12 months Thousand Baht | Over 12 months Thousand Baht | Total Thousand Baht | |
| 31 March 2023 Gross carrying amount - trade receivables | 10,954 | - | - | | - | 10,954 | |
| Loss allowance | - | - | - | - | - | - | |
| 31 March 2022 Gross carrying amount - trade receivables | 54,505 | - | - | - | | 54,505 | |
| Loss allowance | - | - | - | - | - | - | |

The loss allowances for trade receivables as at 31 March reconcile to the opening loss allowances as follows:

| | Consolidate staten | | Separate financial statements | | |
|---|--------------------------|--------------------------|-------------------------------|--------------------------|--|
| | 2023 Thousand Baht | 2022 Thousand Baht | 2023 Thousand Baht | 2022 Thousand Baht | |
| Opening loss allowance at 1 April Increase In loss allowance recognised in profit or loss during the year | 78,982 | 78,982 | - | | |
| Closing loss allowance at 31 March | 78,982 | 78,982 | _ | - | |

The Group write-off trade receivables when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the group, and a failure to make contractual payments or cannot be contacted for a period greater than 180 days past due.

Impairment losses on trade receivables are presented as administrative expenses before finance costs and income taxes. Subsequent recoveries of amounts previously written off are credited against the same line item.

Loan to a subsidiary

Loans to a subsidiary are considered to have low credit risk as they have a low risk of default and the borrower has a strong capacity to meet its contractual cash flow obligations in the near term. Accordingly, the Company has no loss allowances for loans to a subsidiary for the year ended 31 March 2023 and 2022.

5.1.3 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. At the end of the reporting period the Group held deposits at call of Baht 1,423 million (2022: Baht 1,395 million) that are expected to readily generate cash inflows for managing liquidity risk.

Due to the dynamic nature of the underlying businesses, the Group Treasury maintains flexibility in funding by maintaining availability under committed credit lines.

Management monitors i) rolling forecasts of the Group's liquidity reserve (comprising the undrawn borrowing facilities below); and ii) cash and cash equivalents on the basis of expected cash flows. In addition, the Group's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary, monitoring balance sheet liquidity ratios and maintaining financing plans.

a) Financing arrangement

The Group has access to the following undrawn credit facilities as at 31 March as follows:

| | Consolic financial sta | | Separate financial statements | | |
|--|---------------------------|--------------------------|----------------------------------|--------------------------|--|
| | 2023 Thousand Baht | 2022 Thousand Baht | 2023 Thousand Baht | 2022 Thousand Baht | |
| Floating rate Expiring within one year - Bank loans | 1,152,500 | 1,506,923 | | | |
| Total | 1,152,500 | 1,506,923 | - | - | |

b) Maturity of financial liabilities

The tables below analyse the Group's financial liabilities into relevant maturity groupings based on their contractual maturities for:

- (a) all non-derivative financial liabilities; and
- (b) net and gross settled derivative financial instruments for which the contractual maturities are essential for an understanding of the timing of the cash flows.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

5.2 Capital management

The objectives when managing capital are to:

- safeguard their ability to continue as a going concern, to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital based on gearing ratio which is determined by dividing net debt with equity.

6 Fair value

The following table shows fair values and carrying amounts of financial assets and liabilities by category, excluding those with the carrying amount approximates fair value.

| | Consolidated financial statements | | |
|---|-----------------------------------|------------|------------|
| | | Fair value | Fair value |
| | | 2023 | 2022 |
| | | Thousand | Thousand |
| | Level | Baht | Baht |
| Assets | | | |
| Financial assets measured at | | | |
| fair value through profit or loss (FVPL) | | | |
| Derivative assets - Foreign exchange contracts | 2 | 2,835 | 2,044 |
| Financial assets measured at fair value | | | |
| through other comprehensive income (FVOCI) | | | |
| Unlisted equity investments | 3 | 204,960 | 304,320 |
| Liabilities | | | |
| Financial liabilities measured at | | | |
| fair value through profit or loss | | | |
| Derivative liabilities - Foreign exchange contracts | 2 | 1,353 | 211 |

Cash and cash equivalents, trade and other receivables, short-term loans to a subsidiary, Short-term loans from financial institutions and trade and other payables - the carrying amounts of these financial assets and financial liabilities approximate their fair values due to the relatively short-term maturity.

The different levels of financial instruments carried at fair value, by valuation method have been defined as follows:

- Level 1 : Quoted the fair value of financial instruments is based on the closing price by reference to the Stock Exchange of Thailand.
- Level 2 : The fair value of financial instruments is determined using significant observable inputs and, as little as possible, entity-specific estimates.
- Level 3 : The fair value of financial instruments is not based on observable market data.

Valuation techniques used to measure fair value level 2

The fair value above is determined by level 2 using forward rate of foreign currency against Thai Baht at the date of the statement of financial position which can be obtained from observable market.

Valuation techniques used to measure fair value level 3

Changes in level 3 financial instruments for the year ended 31 March is as follows:

| | Consolidated financial statements Unlisted equity investments Thousand Baht |
|---|--|
| Opening balance as at 1 April 2021 | 206,640 |
| Gains (losses) recognised in other comprehensive income | 97,680 |
| Closing balance as at 31 March 2022 | 304,320 |
| Gains (losses) recognised in other comprehensive income | (99,360) |
| Closing balance as at 31 March 2023 | 204,960 |

The following table summarises the quantitative information about the significant unobservable inputs used in level 3 fair value measurements.

| | Fair va | alue | | Range of in | outs |
|----------------------------|--------------------------------------|--------------------------------------|--|-------------|-----------|
| | 31 March 2023 Thousand Baht | 31 March 2022 Thousand Baht | Unobservable inputs | 2023 | 2022 |
| Unlisted equity securities | 204,960 | 304,320 | Profit growth factors Risk-adjusted discount rate | 2% 12% | 2% 12% |

Relationship of unobservable inputs to fair value are shown as follows:

| | | | Change in fa | ir value |
|----------------------------|--|----------------|------------------------------------|------------------------------------|
| | Unobservable inputs | Movement | Increase in assumptions 2023 | Decrease in assumptions 2023 |
| Unlisted equity securities | Profit growth factors Risk-adjusted discount rate | 0.50% 1.00% | Increase 3.5% Decrease 7.8% | Decrease 3.2% Increase 9.5% |

The Group's valuation processes

The fair value of unlisted equity investments is determined using valuation techniques, discounted cash flow which assessed by independent valuer and are within level 3 of the fair value hierarchy.

There were no transfers between Levels 2 and 3 during the year.

There were no changes in valuation techniques during the year.

7 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

a) Fair value of certain financial assets and derivatives

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Group uses judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. Details of key assumptions used are included in Note 6.

b) Impairment of investments in a subsidiary

The Group tests whether investments in a subsidiary have suffered any impairment when indicators of impairment trigger. The recoverable amounts of cash-generating units have been determined based on the fair value less costs to sell or value-in-use calculations. In calculating value-in-use, the Group estimates the present value of future cash flows expected to arise from the cash-generating unit.

c) Goodwill impairment

The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. The calculations use cash flow projections based on financial budget approved by management covering a five-year period.

Cash flows beyond the five-year period are extrapolated using the estimated growth rates stated in Note 18. These growth rates are consistent with forecasts included in industry reports specific to the industry in which each CGU operates.

d) Defined retirement benefit obligations

The present value of the retirement benefit obligations depends on a number of assumptions. Key assumptions used and impacts from possible changes in key assumptions are disclosed in Note 24.

e) Impairment of financial assets

The loss allowances for financial assets are based on assumptions about default risk and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs used in the impairment calculation, based on the Group's past history and existing market conditions, as well as forward-looking estimates at the end of each reporting period.

8 Segment information

Operating segment information is reported in a manner consistent with the Group's internal reports that are regularly obtained and reviewed by the chief operating decision maker (Board of Directors) for the purpose of the allocation of resources to the segment and assess its performance.

The Group's operations involve a single business segment of the manufacture and distribution of long steel products, which is located in Thailand. Sales of a subsidiary is mainly local sales whereas an export sales are not significant. As a result, all the revenues from sales of goods, cost of sales, gross margin, profit for the year and assets of segment are in accordance with the presentation of these financial statements.

For the year ended 31 March 2023, the Group has revenue from sales and related services which has timing of revenue recognition as a point in time amounting to Baht 30,490 million (2022 : Baht 32,468 million) and over time amounting to Baht 208 million (2022 : Baht 122 million).

For the year ended 31 March 2023 and 2022, the Group has no revenue which contributed equal or over 10.0% of the Group's total revenue.

| | Consolid financial sta | |
|------------------------------|---------------------------|--------------------------|
| For the years ended 31 March | 2023 Thousand Baht | 2022 Thousand Baht |
| Segment revenue | | |
| Local | 26,099,280 | 29,497,890 |
| Export | 4,598,646 | 3,091,915 |
| | | |
| | 30,697,926 | 32,589,805 |

For the year ended 31 March 2023, the Company has revenue from services which has timing of revenue recognition as over time amounting to Baht 342 million (2022 : Baht 413 million).

9 Cash and cash equivalents

a) Cash and cash equivalents consist of:

| | Consoli financial st | | Separate financial statements | | |
|--|-------------------------------|------------------------------|------------------------------------|------------------------------|--|
| | 2023 Thousand Baht | 2022 Thousand Baht | 2023 Thousand Baht | 2022 Thousand Baht | |

On 13 July 2021, the Annual General Meeting of the Shareholders of Tata Steel Manufacturing (Thailand) Public Company Limited, a subsidiary, passed a resolution to approve the increase in the registered share capital by converting the promissory notes payable to the Company in the amount of Baht 6,211 million and reduce the registered share capital to compensate the accumulated loss of Baht 4,065 million. The Company paid for capital increased to Tata Steel Manufacturing (Thailand) Public Company Limited by converting debt to equity of Baht 6,211 million (5,176,049,702 ordinary shares at par value of Baht 1.20 per share). The subsidiary registered the increase of paid-up capital with the Ministry of Commerce on 29 July 2021.

On 27 October 2021, Tata Steel Manufacturing (Thailand) Public Company Limited registered the reduction of paid-up capital to compensate the accumulated loss of Baht 4,065 million with the Ministry of Commerce (the share value from Baht 1.20 per share to Baht 0.75 per share).

As at 31 March 2023 and 2022, the Group has made an assessment of impairment loss on investment in a subsidiary and considered that the recoverable amount was not lower than its carrying amount referring to the key assumptions used for an assessment of impairment loss on investment in a subsidiary as described in Note 18, so no additional allowance for impairment was necessary.

In August 2011, the Group's management had decided to cease production of the Mini Blast Furnace ("MBF") at Tata Steel Manufacturing, the Company's subsidiary in view of the high volatility of MBF raw material prices and the prices being relatively higher than scrap prices, which adversely impacting the viability of costs of steel produced through the MBF route.

The Group's management decided to dispose the MBF machinery, equipment and its spare parts and store supplies. The Group initiated active programme to locate buyers. Accordingly, MBF machinery, equipment and its spare part and store supplies are classified as idle assets held-for-sale, under non-current assets, as the Group's management viewed that the disposal is not expected to complete within one year.

During the year ended 31 March 2023, the Group has recognized an impairment charge of MBF of Baht 49 million (2022 : Baht 81 million).

Goodwill resulted from acquisition of The Siam Iron and Steel (2001) Company Limited, The Siam Construction Steel Company Limited and Tata Steel Manufacturing (Thailand) Public Company Limited on 29 November 2002 by Tata Steel (Thailand) Public Company Limited.

Since 1 April 2008, the Group has ceased amortisation of goodwill and has changed to test impairment of goodwill instead.

During the year ended 31 March 2021, The Siam Iron and Steel (2001) Company Limited and The Siam Construction Steel Company Limited transferred entire business to Tata Steel (Thailand) Public Company Limited including goodwill.

As at 31 March 2023 and 2022 the Group has made an assessment of impairment loss on goodwill and resulted that the recoverable amount was not lower than the carrying amount, so no additional impairment was necessary.

Goodwill is allocated to the Group's cash-generating units (CGUs) identified according to each factory.

A segment-level summary of the goodwill allocation is presented below:

The recoverable amount of a CGU is determined based on value-in-use calculations. These calculations use pre-tax cash flow projections based on financial budgets approved by management covering a 5-year period. Cash flows beyond the 5-year period are extrapolated using the estimated growth rates stated below. The growth rate does not exceed the long-term average growth rate for the business in which the CGU operates.

The key assumptions used for value-in-use calculations are as follows:

| | Goodwill from Factory of The Siam Iron and Steel (2001) | Goodwill from Factory of The Siam Construction Steel |
|----------------------------|--|---|
| Gross margin ¹ | 3.0% | 5.7% |
| Growth rate ² | 1.0% | 1.0% |
| Discount rate ³ | 11.4% | 11.6% |

¹ Budgeted gross margin.

² Weighted average growth rate used to extrapolate cash flows beyond the budget period.

³ Pre-tax discount rate applied to the cash flow projections.

These assumptions have been used for the analysis of each CGU

Management determined budgeted gross margin based on past performance and its expectations of market development. The weighted average growth rates used are consistent with the forecasts included in industry reports. The discount rates used are pre-tax and reflect specific risks relating to the relevant segments.

Key assumptions, having significant influence to sensitivity of discounted cash flows, were growth rate and discount rate.

In the segment of The Siam Construction Steel factory, the recoverable amount calculated based on value in use exceed carrying value by Baht 101.49 million. A reduction in gross growth rate of 0.31% or a raise in discount rate of 0.23% would remove the remaining headroom.

As at 31 March 2023, deferred income tax assets are recognised for tax loss and carry forwards only to the extent that realisation of the related tax benefit through the future taxable profits is probable. The Group did not recognise deferred income tax assets of Baht 223 million (2022 : Baht 430 million) in respect of losses amounting to Baht 1,115 million (2022 : Baht 2,152 million) that can be carried forward against future taxable income. Such losses will be expired in 2024 to 2025.

Employee benefit obligations are final salary retirement plans, which provide benefits to employees in the form of a guaranteed level of pension payable. The level of benefits provided depends on employees' length of service and their salary in the final years leading up to retirement.

The movements of employee benefit obligations - Retirement benefits for the years ended 31 March 2023 and 2022 comprise the following:

| | Consolidated financial statements | | Separate financial statements | |

| Salary growth rate | 1.00 | 1.00 | 5,686 | 6,206 | (4,985) | (5,449) | | |
| Staff turnover rate | 20.00 | 20.00 | (3,074) | (3,355) | 3,434 | 3,759 | | |
| | from base | from base | | | | | | |
| | assumption | assumption | | | | | | |

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method has been applied as when calculating the retirement benefits recognised within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year.

The weighted average duration of the employee benefit obligation is 9.00 - 14.00 years (2022 : 9.00 - 15.00 years).

Expected maturity analysis of undiscounted Retirement benefits and Other long-term benefits are as follows:

| | | Consolidat | ed financial st | atements | |

| | | | | | |
| Total income tax (income) expense | (5,831) | (5,860) | 3,191 | 6,666 | |

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the basic weighted average tax rate applicable to profit of the home country of the Company as follow:

| | | lidated | Sepa | |
|--|-------------|-----------|-------------|-----------|
| | tinancial s | tatements | financial s | tatements |
| | 2023 | 2022 | 2023 | 2022 |
| | Thousand | Thousand | Thousand | Thousand |
| | Baht | Baht | Baht | Baht |
| | | | | |
| Profit before income tax | 680,701 | 2,600,265 | 286,132 | 30,934 |
| | | | | |
| Tax calculated at a tax rate of 20% (2022 : 20%) | 136,140 | 520,053 | 57,226 | 6,187 |
| Tax effect of: | | | · | <u> </u> |
| - Temporary differences which were not | | | | |
| recognised as deferred tax assets | (22,230) | (29,215) | - | - |
| - Income not subject to tax | - | - | (54,141) | - |
| - Expenses not deductible for tax purpose | 9.973 | 4,740 | 173 | 798 |
| - Double tax expenses deductible | (339) | (555) | (67) | (319) |
| - Utilisation of tax loss carried forward which | (000) | (000) | (01) | (0.0) |
| was not recognised as deferred tax asset | (129,375) | (500,883) | - | - |
| | (120,010) | (000,000) | | |
| Tax charge | (5,831) | (5,860) | 3,191 | 6,666 |
| ian ulaiye | (5,651) | (3,800) | 3,191 | 0,000 |

The Group's and the Company's weighted average applicable tax rate were (0.86)% and 1.12%, respectively (2022 : (0.23)% and 21.55%, respectively). The effective tax rate for separate financial statements changed from the previous year because in 2023, the Company had dividend income which was not subject to tax amounting to Baht 270.71 million.

The tax credit/(charge) relating to component of other comprehensive income is as follows:

| | Consolidated financial statements | | | | | <u> </u> |
|--|-----------------------------------|---|-------------------------------|--------------------------------|---|-------------------------------|
| | | 2023 | | | | |

34 Related party transactions

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with, the company, including holding companies, subsidiaries and fellow subsidiaries are related parties of the company. Associates and individuals owning, directly or indirectly, an interest in the voting power of the company that gives them significant influence over the enterprise, key management personnel, including directors and officers of the company and close members of the family of these individuals and companies associated with these individuals also constitute related parties.

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form.

The following transactions were carried out with related parties:
