But even though he is not joining for antici-

promptly dismissed the FIR against the

The FIR was registered under sections 420 and 467 of the Indian Penal Code for criminal fraud and cheating.

Gujarat to develop India’s first API park near Bharuch

According to Gujarat Chief Minister Bhupendra Patel, there is a demand from industries looking for a large number of chemical industries in the state to set up in the Bharuch district, which is close to the API park. The government is planning to promote the Bharuch API park as the major API park in the country.

Patel also said that the state is in advanced stages of setting up an API park in the Kutch district. The Api park has been planned in an area measuring 2100 acres, which was earlier a Lebua petrochemical plant. It will be spread over 5000 acres and will have a workforce of 2000.

In the new API park, which is expected to come up by 2023, the state will invest Rs 2,000 crore and provide all necessary infrastructure facilities. The park will also be equipped with the latest technology and facilities to meet the needs of the high-tech chemical industries.

Gujarat’s first API park will be developed in the Bharuch district and will be developed on a model similar to the chemical clusters in Venice, Italy and Belgium.

The new API park is expected to create 50,000 jobs and generate Rs 1 lakh crore of revenue for the state. The park will also help in reducing the import of chemicals, which currently stands at Rs 30,000 crore per year.
