## PART - F

Characteristics of hazardous as well as solid wastes and their method of disposal:

| Hazardous / Solid <br> wastes | Characteris <br> tics | Method of disposal |
| :--- | :---: | :--- |
| Metal Finishing <br> Wastes | Ferrous | Auctioned to outside parties to <br> reuse. |
| Zinc Metal Wastes | Zinc <br> compound | Sent to registered recyclers. |
| Pickling Sludge | Acidic | Sent to registered recyclers. |
| Phosphating Sludge | Acidic | Auctioned to outside parties to <br> reuse. |
| ETP Sludge | Acidic | Sent to TSDF facility outside the <br> premise. |

## PART - G

Impact of pollution control measures on conservation of natural resources and consequently on the cost of production.

- Necessary measures have been taken to increase yield and reduce electricity, water and oil consumption, which reduces the overall cost of production.
- 3200 m3 Rain Water Harvesting structure/Pond has been installed in old scooter shed area inside plant premises.
- For FY 20, 590 nos. of saplings were planted. Almost all vacant space inside plant premises is covered with plantation and being maintained.

## PART - H

Additional investment proposal for environmental protection including abatement of pollution

Effluent monitoring system is in place at ETP. However, online stack emission monitoring system in one stack is going to commissioned.
