A.	SPECIFIC COI	NDITIONS								
i.	Proper ai plant using flue gas shall b			of generators	coke (WHR	oven B) shall	gases be	in ensured	po and	ower no
Com	 The coking coal is fed after crushing into Heat Recovery type coke oven batteries consisting of chambers made of refractory. The Carbonization of coal takes place at 1100 to 1250° C and the heat for carbonization is supplied by combustion of volatile matters evolved from the coal charged by admitting air into the chamber. The hot flue gas free from volatile matters is used to generate electric power by generating steam in waste heat recovery boiler. Presently the plant is operating at rated capacity of 1.6 MTPA coke production and with120 MW power generation at a plant load factor of 92% – 93%. From October '14 to March 2015 total coke production was 756972 DMT (Dry Metric Ton) and 443.1 Million Unit of power generation.

M/s Tata Steel Ltd, Hooghly Met Coke Division, Haldia

Compliance to Conditions stipulated in Environmental Clearance for Coke Oven Plant (1.6 MTPA) & WHRB (120 MW) at Haldia, East Midnapur, West Bengal from MoEF, New Delhi on 29th January, 2007 vide letter# F. No. J-11011//284/07- IA II (I)

Period -October 2014 - March 2015

Com

- As per notification no. GSR 46(E) dated 3rd February 2006, no emission standards for Non recovery coke oven plant have been mentioned. Since this is the new unit established after the notification of 2006 published, the Non recovery / waste heat recovery technology has been adopted for coke making which is environment friendly method.
- The emission standard specified in the Environmental Clearance, under Specific condition (iii) for stack emission has been followed.
- To reduce the SPM, non recovery type technology is being used. The coal is being charged inside the oven under negative pressure for 66 hours in a temp of 950 – 1200 °C as a result the volatiles evolved during coal carbonization is being combusted completely in presence of controlled quantity of air so emission of any particulate matter is very low. The stack height is 70Mt from GL. The emission from all stack are much less than 100mg/Nm3 of SPM.
- Regular stack monitoring is done by registered third party. Online stack monitoring system is also installed in all 7 chimney.
- The Avg PM (month wise) data is as follows:

STACK PM Level (mg/Nm3): By Third party

Month	PM (6% Co2 (V/V))
Oct-14	41.75
Nov-14	38.28
Dec-14	28.75
Jan-15	36.00
Feb-15	29.33
Mar-15	24.25
AVG	33.06

STACK PM Level (mg/Nm3): As per Opacity Meter

	PM
Month	
Oct-14	54
Nov-14	28.71
Dec-14	29.57
Jan-15	32.86
Feb-15	35
Mar-15	40
AVG	36.69

The Stack emission detail report for last six month (October'14 - March'15) enclosed as **ANNEXURE - 2**

	_			•							

Com

- Besides the continuous water sprinkling at coal handling plant and all transfer point; the Dust Suppression System with Dry Fogging (DF) has been commissioned. In Wagon Tippler, Coal crusher unit and all the coal transfer points the DF and dust suppression system is operational.
- Dry fog system for coal and coke handling to restrict particulate emission to within 10 mg per cu m have been installed. The system has been installed at Wagon tippler unit, coal crusher unit, Coal / coke transfer points like Junction House # 5 (Cl#7 belt discharge pt., CL#8 belt receiving pt.); Junction House # A (WCK#1, 2 belt discharge pt. WCK#3 belt receiving pt.); Junction House # B (WCK#3 belt discharge pt. RCK#1, CK#1 belt receiving pt.); Junction House # C (WCK#5, 6 belt discharge pt. CK#7 belt receiving pt.); Junction House # D (WCK#7, RCK#3 belt discharge pt. CK#1 belt receiving pt.); Screen House. In last six month 5 numbers of DF points have been constructed in coal handling area at Junction House # 1, 2 & 2A. Regular maintenance is being done for making this system effective

- More than 2 Kilometers of the road inside the material handling area has been paved to reduce the
 dust generation. The total coal yard (area of 25000 sq. Mt.) has also been concreted in order to
 prevent the dust generation.
- Movable water tanker with sprinkling arrangement is used for water sprinkling purpose in the road within factory and in the periphery area and also the mechanised Mobile Vacuum Cleaning system is being used regularly for arresting the fugitive emission
- All around the stock yard the boundary wall has been constructed to restrict the dust flowing outside the factory. The average height of the wall is 5 mt.
- 30 numbers of the "Rain Gun Water Sprinklers" have been installed in the coal yard to prevent the generation of fugitive emission from the coal heap. These sprinklers can rotate at 360° and can spray the water at a radius of 15 meter. The height of the sprinklers are approx 2.6 mt.

Prescribed limits regularly monitored and records maintained. Guideline: // Code of Practice issued by the CPCB in this regard shall be followed. The ovens work under the negative pressure so secondary fugitive emissions are negligible in this non recovery coke making technology All workers are being provided with PPEs for protection HMC is following the CPCB guidelines so far the non recovery coke oven plant operation is being concerned. Positive sealing arrangements has been provided in the oven doors and flue gas pipes/valves Gaseous emissions are monitored regularly; corrective action taken whenever the results found crossing the limit. VI. Total requirement of the water from Haldia Development Authority for coke oven and WHRB shall not exceed 5,300 m3/day and 13,754 m3/day respectively. The effluent shall be treated in the effluent treatment plant and all the treated wastewater shall be recycled and reuses either in the process or for dust suppression or green belt development No wastewater shall be discharged outside the factory premises and either officency shall be adopted. Domestic effluent shall be treated in sewage treatment plant (STP) and disposed off as per norms laid down by Haldix Municipal Corporation. Com The average water taken from HDA as make-up water during October '14 to March '15 was 1658 m3/day approximately for coke oven (Tata Steel, Hooghly Met coke) and 8305 m3/day approximately for WHRB (Tata Power) which is within the permissible limit granted by the MOEF The detail water consumption report is enclosed as: ANNEXURE 3 The processed water is being tested and recycled and used for coke quenching and for green beit development within the plant. Initiatives taken for achieving Zero Discharge are: A Storm water pond has been developed. The capacity of the pond is 4000 Cu m (approx). Pipe line has been laid in all 4 rows for use the same water for coke Quenching purpose Pump has been installed at the end of Row#4 drain final outlet to re-circulated the water in the quenching		 The workplace air quality, as well as ambient air quality (PM₁₀ & PM_{2.5}) is being monitored at the regular intervals, summary of the same is given in subsequent paragraphs. The ambient air monitoring for 12 parameters as per National AAQ standard have also been done. The details data are enclosed as : ANNEXURE 1

	 Water Cess being paid to WBPCB at regular basis (last cess paid in December 2014 for the Assessment period 01/07/2014 to 30/09/2014 against the invoice raised by WBPCB).
viii.	Coal and coke fines shall be recycled and reused in the process. All the other solid waste including broken refractory mass shall be properly disposed off in environment-friendly manner. The waste oil shall be properly disposed off as per the Hazardous Waste (Management & Handling) Rules, 1989 and subsequent amendments.
Com	 Coal fines are reused and coke sludge is being sold (100%) to the coke manufacturer for making low graded coke. The waste oil is being sent to the authorized re-processor. The oil soaked jute/cotton waste generated from the process is being incinerated in the coke oven batteries and burnt at the temp of 1000 - 1200 °C for 66 hours The used oil generated from the process is being sent to authorized reprocessor The ceramic blankets are being disposed to the authorized TSDF.
ix.	All the environment management measures given in the EIA/EMP shall be implemented and complied with.
Com	 Implementation of protection measures as indicated in the REIA are implemented. Online stack monitoring systems are being commissioned. For dust suppression DF system has been installed. Acoustic enclosures / barriers / shields are being used to reduce noise, providing the personal protective equipments like ear plugs/ muffs etc are also being provided.
х.	As proposed, green belt shall be developed in 27 % area as per the CPCB guidelines in consultation with DFO.
Com	 So far nearly 26 % of the plant area (nearly 198000 sq mt considering each tree covers 2.5 X 2.5 sq mt of space)) occupied by Tata Steel Ltd., have been covered by green belts. Nearly 31721 trees are being planted which are by nature evergreen, leafy, fast growing, substantially abate the dust pollution, filter the polluted air, reduce the noise and fugitive emission. The areas where tree plantation are not feasible, and also not required to be paved, are being covered with grass, hedges and low bushes with flowering trees for beautification and to avoid soil erosion. The details of the trees planted are given below. Every year plantation done in available space. The detail plantation done till date is enclosed as <u>ANNEXURE: 5</u> Free saplings have been distributed to District Hospital, local school. Jointly with Haldia Municipality taken part in the "Green Haldia: Clean Haldia" project and planted nearly 600 trees on the both side of the main road of Haldia. as a part of CSR activity.
В.	GENERAL CONDITIONS
i.	The project authority shall adhere to the stipulations made by West Bengal Pollution Control Board (WBPCB) and State Government.
Com	Complied.
ii.	No further expansion or modification of the plant shall be carried out without prior approval of this Ministry.
Com	For further expansion of the project proper application in Form 1 has been submitted to MOEF on May 2014 and TOR presentation to EAC has been done on August 2014. Further expansion will be carried out only after receiving the approval of the Ministry
iii.	The gaseous emissions from various shall conform to the load/mass based standards notifically 19th May, 1993 and standards prescribed from time to Created with

	Pollution Control Board (WBPCB) may specify more stringent standards for
	the relevant parameters keeping in view the nature of the industry and its size and location. At no time, the emission level shall go beyond the prescribed standards. Interlocking facilities shall be provided so that process can be automatically stopped in case emission level exceeds the
	limit.
Com	Complying all the conditions stipulated by WBPCB.
iv.	Ambient air quality monitoring stations shall be set up as per statutory requirement in consultation with the WBPCB. Ambient air quality including ambient noise levels shall not exceed the standards stipulated under EPA or by the State authorities. Monitoring of ambient air quality and shall be carried out regularly in consultation with WBPCB and data submitted to the Ministry's Regional Office at the Bhubaneswar, WBPCB & CPCB regularly. The instruments used for ambient air quality monitoring shall be calibrated time to time.
Com	 Different areas have been identified within the factory premises where Ambient Air Quality is being tested at a regular basis. Beside this the Work zone air quality also being tested at a regular basis by the certified 3rd party. The summary is enclosed. ANNEXURE 1 All the tests being carried out by third party registered by WBPCB Air monitoring for 12 mandatory parameter has been done. In every two months at different locations within the factory premises. Regular noise monitoring also been done by the accredited 3rd party. The half yearly data are being submitted to Ministry's Regional Office at the Bhubaneswar, WBPCB, Haldia office. The instruments used for ambient air quality monitoring by the accredited 3rd party is being calibrated time to time and the calibration certificates are collected from the party.
v.	The overall noise levels in and around the plant area shall be kept well within the standards (85 dBA) by providing noise control measures including acoustic hoods, silencers, enclosures etc. on all sources of noise generation. The ambient noise levels shall conform to the standards prescribed under Environmental (Protection) Act, 1986 Rules, 1989 viz. 75 dBA (day time) and 70 dBA (night time).
Com	 The noise level inside the plant has been recorded between specified limit The control measures such as; silencers, enclosures, hoods, rubber pads, have been provided at the appropriate places in the existing plant. The work areas where noise levels are high, earplugs and earmuffs have been provided to reduce the noise exposure. The detail report is enclosed as <u>ANNEXURE - 4</u>
vi.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained as per the Factories Act.
Com	 The health surveillance is being done as per Factory Act. Up to March 2015, PME (Periodical Medical Examination) has been done for more than 94% of company employees (330 employees). Records are maintained at the Occupational Health Centre. Health check up for contractors persons are conducted regularly during the time of the renewal of the respective gate pass. 100% checkup happened for contractor employees and records are being maintained at the OHC.
vii.	All the recommendations mentioned in the Corporate Responsibility for Environmental Protection (CREP) of CPCB issued for the steel plants shall be implemented
Com	The CREP has been implemented by Tata Steel - JSR works since this unit is the stand alone coke making unit only. The coke is being transferred to JSR H Blast furnace for making the steel. The integrated steel work is at Jamshedpur The company follows the Tata Steel CSR policy. The company follows the Tata Steel CSR policy. The company follows the Tata Steel CSR policy.
	The company follows the Tata Steel CSR policy Created with

Compliance to Conditions stipulated in Environmental Clearance for Coke Oven Plant (1.6 MTPA) & WHRB (120 MW) at Haldia, East Midnapur, West Bengal from MoEF, New Delhi on 29th January, 2007 vide letter# F. No. J-11011//284/07- IA II (I)

Period -October 2014 - March 2015

At HMC a separate CSR committee that executes various activities like, free medical checkup and medicine distribution camp for children, eye testing camp and free spectacle distribution, school books, teaching aids, school bags, winter cloths distribution to BPL people, infrastructure

development for local school like Toilets for Girls, septic tank, water tank, boundary fencing for the school boundary, electrification arrangement and fittings, desks and chairs and tables for the students etc have been done. Regular monthly CSR activity has been planned and executed. **CSR Activity Plan FY'15:** CSR Activities Plan:: FY '15 **ACTIVITIES** Apr May Jun Jul Aug Sep Oct Nov Dec Jan Feb Mar Free Medical check-up camp at **Primary School** Awareness on general hygiene / natural resources Free eye Check-up Camp Inter-school Quiz Contest Road Safety, Domestic Safety & General Safety awareness for school Children Infrastructure Development Programme for local Schools Aids for deaf & dumb School children Art workshop for School Children Educational & recreation of Furniture to Schools Community development initiatives programme (sports / quiz etc.) viii. The shall company undertake eco-development measures including community welfare measures in the project area. Com The local people nearly 256 people as permanent employee and over 1000 as contractual employees are being employed by the company. Trees planted at various places of the town. Nearly 500 trees (Gulmohar / Chatim / Mehegoni etc) planted at the road side approaching towards the factory. More than 2000 fruit sapling being distributed amongst all employees for planting at their locality Jointly with Haldia Municipality Corp, HMC has taken active part in the "Green Haldia: Clean Haldia" project and planted 600 trees in the Road from Ranichak to Mohana Market, Haldia As a part of welfare activity, 5 nos of primary schools, mainly for BPL people, have been considered. Some infrastructural development like making toilets the school, electrification jobs, school furniture etc are being done

M/s Tata Steel Ltd, Hooghly Met Coke Division, Haldia

Compliance to Conditions stipulated in Environmental Clearance for Coke Oven Plant (1.6 MTPA) & WHRB (120 MW) at Haldia, East Midnapur, West Bengal from MoEF, New Delhi on 29th January, 2007 vide letter# F. No. J-11011//284/07- IA II (I)

Period -October 2014 - March 2015

- Fully sponsored sports activities for the locality have been organized.
- More than Rs. 15 lakhs had been spent for CSR and welfare activity in FY15 by HMC division.
 Tata power organises separate CSR activities and they have spent nearly Rs. 27 lakhs in FY'15 for CSR activities
- In the FY 15 Total budget of Rs. 16 lakhs have been allocated (Rs 1 / ton of coke production) in order to spend for community welfare and CSR activity.
- For community development some infrastructural development in the neighboring area has been planned like infrastructural improvement in the local community

This section co-ordinates and provides necessary services on environmental issues of the entire unit. This section is responsible for implementation of Environmental Management Plan and interaction with the environmental regulatory agencies, reviewing policy and planning and mitigates all statutory compliances. This section interacts with State Environment Department, Ministry of Environment & Forests (MoEF), Central Pollution Control Board (CPCB), West Bengal Pollution Control Board (WBPCB) and other environment regulatory agencies.

The major responsibilities of the EMS includes:

- Obtaining Consent from WBPCB.
- Environmental monitoring
- Analysis of environment data, reports, preparations and transmission of report to statutory authorities, Corporate cell etc.
- Compliance with guidelines and statutory requirements.
- Coordination with statutory bodies, functional groups of the unit, Corporate Environment Management Cell
- Interaction for evolving and implementation of modification programmes to improve the availability / efficiency of pollution control devices / systems.
- Environmental Appraisal (Internal) and Environmental Audit.

The Corporate Environment Management Cell of Tata Steel, Jamshedpur works, headed by Chief – Environment and respective Heads – Environment also monitors and supervises the environmental activities of the HMC division at a regular basis.

Tata Power has a separate Environment Management Cell for monitoring environmental activities and statutory compliances in terms of power generation and distribution

xii.	Adequate	funds	shall	be	allocated	towards	the	capital
	cost and	recurring	cost/annum	environr	nental pollu	ıtion control	measure	s and
	utilized jud	liciously	to implement	the	conditions	stipulated by	the	Ministry
	of Environm	nent and	Forests as	well as	the State	Government.	The fu	ınds so
	provided shall	not be diver	ted for any other	purpose.				

Com

In HMC, Separate Fund is allocated for carrying out continuous water spraying & sprinkling system, mobile vacuum cleaning system, within the plant area for controlling dust, installation & regular maintenance of DF system to control fugitive emission, installing Online Stack monitoring system etc. Fund for Green Belt development and CSR activity have also being allocated which are used in a planned manner.

SI No.	Items	Amount Spent (in FY'15)
1	Water sprinkling on the road for dust	
	suppression	Rs. 11.5 Lakhs
2	For cleaning/ housekeeping	Rs. 236 Lakhs
3	Installation of DF and Maintenance and	
	spares for Dry Fog system	Rs. 12 Lakhs
4	Green belt maintenance	Rs. 25 Lakhs
6	Environment Parameters monitoring	Rs. 3.5 Lakhs
	Online Opacity meter installation &	
7	commissioning and maintenance	Rs. 65 lakhs
	TOTAL EXPENSES	Rs. 353 Lakhs

xiii. The Regional Office of this Ministry Bhubaneswer at **CPCB WBPCB** shall monitor the stipulated conditions monthly compliance report monitored and the data interpretation shall be submitted to them regularly.

Com	 Environment Audit Report FY 13 –14 had been submitted to WBPCB on 26 September 2014 Six monthly environmental performance monitoring Report for April 2014 – September 2014 has
	also been submitted to MOEF, Regional Office, Bhubaneswar on 18 October 2014 via email and hard copy has also been couriered. The same report has been submitted to WBPCB office also.
xiv.	The Project Authorities shall inform the Regional Office
	as well as the Ministry, the date of financial closure and final approval
	of the project by the concerned authorities and the date of commencing the land development work.
Com	
	 All required information has been intimated to WBPCB while obtaining Consent to Operate. The validity of Consent to Operate is up to 31 May 2015.
xv.	The Project Proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the W. B. Pollution Control Board / Committee and may also be seen at Website of the Ministry of Environment and Forests at http://envfor.nic.in. This should be advertised within seven days from the date of issue of the clearance letter at least in two local newspapers that are widely circulated in the region
	of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the Regional office at Bhuvaneswar.
Com	 Communication regarding grant of environment clearance were given to the community on 08.03.2008 through newspaper advertisements. Details of which are given below. Financial Express – (English Adv.) / Aajkal – (Bengali Adv.) dated 08.03.2008. The compliance of the same was informed to MoEF (Regional Office – Bhubaneswar) through letter dated 11.03.08 by post.
