1.	Waste	As covered in Part-D	

PART – F

Please specify the characterizations (in term of consumption and quantity) of hazardous as well as solid waste and indicate disposal practices adopted for both these categories of wastes.

All the biomedical wastes are disposed-off as per applicable rules. The hospital has autoclave, plastic shredder, bins of various colors, effluent pit etc. for treatment and handling of bio-medical waste. Disposal of incinerator waste is done through Common Bio-medical Waste treatment facility.

PART – G

Impact of the pollution abatement measures taken on conservation of natural resources and on the cost of production.

- ETP has been installed to treat the effluent generated in hospital premises. After effluent being treated and tested, the treated water is used for parks and garden development. This eliminated the cost of water supply via tanker.
- Bins and plastic bags are used as per BMW rules 2016 to handle all type of waste as per specified color coding.
- Disposal of incinerator waste is done through Common Bio-medical Waste treatment facility. Estimated annual cost is around 250 Lakh for disposal of incinerator waste for FY24.

PART – H

Additional measures/ investment proposals for Environment protection including abatement of pollution, prevention of pollution.

Jharia Division of Tata Steel Ltd. is committed to improve safety and environment by strictly practicing Environmental Management System of company. Various programs are arranged such as World Environmental day, Annual Flower Show, Green school project, Tata volunteering week, etc. for public awareness. Also, various initiatives for biodiversity enhancement in the region have been
