

Member Secretary,
State Environmental Impact Assessment Authority (SEIAA), Odisha
Bhubaneswar – 751 023, Odisha

TSK/Env/C-05/ 64 /2024
27th Nov' 2024

Dear Sir,

Sub.: Six Monthly Compliance Report for April'24 to Sep'24, for Environmental Clearance for Residential Complex of Tata Steel at Kalinganagar Industrial Complex, Jajpur, Odisha.

Ref.: (i) EC Granted by SEIAA vide Letter No. SEIAA/ 4669 dated 17.08.2015
(ii) EC validity Extension granted by SEIAA vide File No. SIA/OR/MIS/271482/2022 dated 04.05.2023.

We enclose herewith Six-Monthly Compliance Report for the period from April'24 to Sep'24 for the conditions stipulated in Environmental Clearance on 17.08.2015 and subsequent validity Extension dated 04.05.2023 granted by SEIAA, Odisha for construction of Residential Complex of Tata Steel Plant located at Kalinganagar Industrial Complex, at Khurunti and Gadapur, Dist. Jajpur, Odisha for your kind considerations.

We trust the information furnished is in line with your requirement.

Thanking you,

Yours faithfully,

Raju Agrawal
Head, Environment, TSK

Encl. a/a

Copy to: The Addl. PCCF, Eastern Regional Office, MoEF&CC, BBSR for his kind perusal.

TATA STEEL LIMITED

Construction of Residential Complex For Tata Steel Plant located at Kalinganagar Industrial Complex, at Khurunti and Gadapur, Dist- Jajpur, Odisha

Environment Compliance Report (April'24 to Sep'24)

**Environment Department
Tata Steel Limited
Kalinganagar Industrial Complex
Duburi- 755026
Dist- Jajpur, Odisha**

GENERAL CONDITIONS	STATUS AS ON 30.09.2024
<p>1. The Project Proponent shall comply with all the conditions stipulated in the building approval letter.</p>	<p>We are implementing the project as per the conditions stipulated in the building approval letter vide KNDA letter no: BP/115/18(Revised) 1124/KNDA dated 15.12.2018 such as:</p> <ol style="list-style-type: none"> 1. Drawing confirming to KNDA (Planning and building Standards) regulation 2017, in terms of all building parameters including parking and plantation norms. 2. The land over which construction was proposed is accessible by an approve means access of 35 mtr in width. 3. Parking space measuring 29016.32 sqm has been handed over for occupancy against 40463 m2 as per the approved KNDA plan. 4. Occupancy certificate for Building D wing A, building E wing A&B, Building F wing A, B, and C, Building G Wing A, B and C have been obtained from KNDA prior to occupancy of the building. 5. NOC obtained from Airport Authority of India.
<p>2. The applicant (Project proponent) will take necessary measures for preventions, control and mitigation of Air Pollution, Water Pollution, Noise Pollution and Land Pollution including solid waste management as mentioned by them in form-1, form-1A, and Environment Management plan (EMP) in compliance with the prescribed statutory norms and standards.</p>	<p>Measures are being taken for preventions, control and mitigation of Air Pollution, Water Pollution, Noise Pollution and Land Pollution including solid waste management as mentioned in form-1, form- 1A, and Environment Management plan (EMP) in compliance with the prescribed statutory norms and standards.</p> <ol style="list-style-type: none"> 1. For Air pollution control, regular Water Sprinkling is being done, maintained covered sand quarries. Cement for construction activities being brought to the site by closed cement bulker truck. Continuous

GENERAL CONDITIONS	STATUS AS ON 30.09.2024
	<p>Ambient Air Quality Monitoring Station has been installed at Residential complex to monitor 24x7 Air Quality.</p> <ol style="list-style-type: none"> 2. For Water Pollution Control - Rainwater Harvesting has been adopted (40 nos recharge pits) and 1000KLD STP is in operation 3. The solid waste generated is properly collected, segregated and disposed on regular frequency. Wet garbage is converted into manure through Organic waste converters (2 Nos each having input capacity of 200 Kg/day). <p>More than 20% of the area has been developed as green belt.</p>
<p>3. The applicant will take statutory clearance/ approval/ permissions from the concerned authorities in respect of the project as and when required.</p>	<p>Statutory clearance/ approval/ permissions from the concerned authorities have been obtained in respect of the project as and when required, which includes:</p> <ol style="list-style-type: none"> 1. Approval from Kalinganagar Development Authority (KNDA). vide KNDA letter no: BP/115/18(Revised) 1124/KNDA dated 15.12.2018. 2. NOC from Director General of Civil Aviation for building height. Vide AAI NOC ID No- BHUB/EAST/B/110215/213874 & BHUB/EAST/B/091424/1227852 vide dated 17.09.2024. 3. NOC from Fire Department, Odisha. Vide Certificates no- 03/FPW dated 31.01.2019, 15/FPW dated 30.11.2019, 03/FPW dated 12.01.2021, 19/FPW dated 18.08.2021, FIRCER1101010062024004354 dated 22.04.2024, FIRCER1101010062024005082 dated 19.09.2024 & FIRCER1101010062024005080 dated 19.09.2024

GENERAL CONDITIONS		STATUS AS ON 30.09.2024
		<p>4. CTE and CTO from Odisha State Pollution Control Board. CTO: OSPCB vide Letter No. 4649 dtd.30.03.2024. CTE: OSPCB vide. letter No. 17242 dtd. 31/10/2015</p> <p>5. Occupancy certificate from KNDA. Vide KNDA letter no: BP-115/18/161/KNDA Dated 14.03.2019, BP-115/18 (Part II) 244/ KNDA Dated 29.02.2020, BP-03/21-828 / KNDA Dated 26.04.2022, BP-161/21 & 91/22-(Part-IV) 1199/KNDA dated 11.07.2022, & BP161/21/91/22 & 91/22 (2) – (Part -V) 851/KNDA dated 06.09.2024.</p>
4.	The applicant will submit half-yearly compliance report on post environmental monitoring in respect of the stipulated term and conditions in the environmental clearance to the State Environmental Impact Assessment Authority (SEIAA), Odisha, SPCB & Regional Office of the Ministry of Environmental & Forest, Odisha, on 1 st June and 1 st December of each calendar year.	We are submitting the six-monthly compliance report in stipulated time. Last Six-monthly compliance reports for the period Oct'23 to Mar'24 was submitted to MoEF&CC/ OSPCB Regional Office vide letter No. <i>TSK/Env/C-05/ 20 /2024</i> dated 30.05.2024.
5.	The project proponent shall obtain periodic Occupancy Renewal Certificate from the Competent Authority at an interval of 3 to 5 years as per the provisions of National Building Code (NBC) 2005.	We have obtained the Occupancy certificate from Kalinganagar Development Authority on 14.03.2019, 29.02.2020, 26.04.2022, 11.07.2022 and 06.09.2024.
6.	The proponent shall comply to all the conditions stipulated by the Fire Prevention Officer, Odisha.	Conditions being complied as stipulated in the Fire Safety Certificates issued on 31.01.19, 30.11.2019, 12.01.21, 18.08.2021, 22.04.2024 and 19.09.2024 by the Chief Fire officer, Fire prevention wing.
7.	The Applicant will adopt the prescribed norms, and standards provided in the national Building Code of India 2005.	<p>Being complied.</p> <p>Norms including the followings.</p> <p>1. Width of fire tender route are provided with 6mtr wide road.</p> <p>2. Building setbacks are being maintained in line with the NBC 2005.</p> <p>3. Lifts are provided in each tower of the building.</p>

GENERAL CONDITIONS		STATUS AS ON 30.09.2024									
		<p>4. Floor Area Ratio (FAR) has been maintained 0.59.</p> <p>5. Firefighting systems are in placed in each tower according to the building height.</p> <p>6. Design data based on NBC 2005 are being followed.</p>									
8.	Consider the peak water consumption of the occupants, the design of the water supply system and sewage disposal system of the project should be based on the provisions of the water consumption.	The water supply system and sewage treatment system of the project are designed based on the peak water consumption. The projected water consumption is 650 KLD, and the effluent treatment capacity is 1000 KLD at full capacity. The current water consumption ranges between 450-500 KLD.									
9.	The Project Proponent should ensure advertising in at least two local newspapers widely circulated in the region, one of which shall be in vernacular language informing the public that the project has been accorded environment clearance and copies of clearance letters are available with SEIAA, Odisha and the State Pollution Control Board (SPCB) And may also be seen on the website of the board. The Advertisement shall be made within 7 days from the date of issue of the environmental clearance & a copy of the same should be forwarded to the regional office of MoEF, Bhubaneswar.	<p>Details of Newspaper advertisement are as below: -</p> <table border="1"> <thead> <tr> <th><u>Newspaper</u></th> <th><u>Language</u></th> <th><u>Date</u></th> </tr> </thead> <tbody> <tr> <td>New Indian Express</td> <td>English</td> <td>15.09.15</td> </tr> <tr> <td>Samay</td> <td>Odia</td> <td>15.09.15</td> </tr> </tbody> </table> <p>Copy of the advertisement was submitted to SEIAA/MoEF/OSPCB vide our letter KPO/Env/C-08/61/2015 dated 18.09.2015. Please refer Annexure-1.</p>	<u>Newspaper</u>	<u>Language</u>	<u>Date</u>	New Indian Express	English	15.09.15	Samay	Odia	15.09.15
<u>Newspaper</u>	<u>Language</u>	<u>Date</u>									
New Indian Express	English	15.09.15									
Samay	Odia	15.09.15									
10.	A copy of the clearance letter shall be sent by the proponent to concerned panchayat, Zila Parisad / Municipal Corporation, Urban Local Body and the local NGO, if any, from whom suggestions / representations, if any, were received while Processing the proposal. The clearance letter shall also be put be on the Website of the Company by the proponent.	<p>Copy of EC was submitted to Sarpanch-Sarangapur Gram Panchayat and Zila Parishad vide our letter no KPO/Env/C-08/62/ 2015 dated 18.09.2015.</p> <p>Copy of EC was submitted to Kalinganagar Development Authority (KNDA) on 10.09.2015 vide letter KPO/CS/0135/15.</p>									
11.	The Proponent Shall upload the status of compliance of the stipulated environmental clearance conditions, including result of monitoring data on their website and shall update the same periodically. It shall	Status of compliance of the stipulated environmental clearance conditions, is available in company's website https://www.tatasteel.com/corporate/our-									

GENERAL CONDITIONS		STATUS AS ON 30.09.2024
	simultaneously be sent to the Regional office of MoEF, SEIAA, Odisha, the respective zonal Office of CPCB and SPCB.	organisation/environment/environment-compliance-reports/ We are submitting the six-monthly compliance report in stipulated time. Last Six-monthly compliance reports for the period Oct'23 to Mar'24 was submitted to the Regional Office of MoEF&CC, SEIAA, Odisha, the respective zonal Office of CPCB and SPCB in soft copy on 31.05.2024. Environmental Monitoring Data for Period Apr'24 to Sep'24 is attached as Annexure-2 .
12.	The Environment statement for each financial year ending 31 st March in form-V as is mandated to be submitted by the project proponent to the concerned State Pollution Control Board as prescribed under the Environmental (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the Status of compliance of environmental clearance conditions and shall also be sent to the respective regional Officers of the Ministry by e-mail.	Both, Environment Statement and Status of Compliance of EC conditions are available on company's website. https://www.tatasteel.com/corporate/our-organisation/environment/environment-compliance-reports/
13.	Any appeal against this environmental clearance shall lie with the Hon'ble National Green Tribunal, if preferred, within a period of 30 days as prescribed under section 16 of the National Green Tribunal act, 2010.	We acknowledge that any appeal against this Environmental Clearance (EC) filed with the National Green Tribunal within 30 days, as stipulated under Section 16 of the National Green Tribunal Act, 2010.

A. CONSTRUCTION PHASE

SPECIAL CONDITIONS		STATUS AS ON 30.09.2024
1.	No ground water shall be extracted for the project work at any stage during the construction phase. If ground water will be used during construction phase, they shall obtain permission from the Water Resource Department.	Present water requirement of about 450-500 KLD for the said residential complex is being met from our Tata Steel Plant. For which we have agreement with Jaraka Irrigation Department, Dept. of water resource, Govt. of Odisha and

	SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
		water allocation letter granted by dept. of water resource, Govt. of Odisha vide water resource department's letter No 5550 dated 26.02.2024.
2.	Provision shall be made for the housing of construction labourers within site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilet, mobile STP safe drinking water, Medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of project.	Source of laborers is mainly from local area. No temporary housing is provided for construction laborers in the project site. First aid and medical facilities are available close to the site.
3.	A First Aid room will be provided in the project site both during construction and operation of the project.	First Aid room has been provided within the complex.
4.	All the topsoil excavated during construction activities should be stored separately for use in land filling, horticulture/landscape development within the project site.	The topsoil excavated during construction has been effectively utilized for landscape development and plantation.
5.	Disposal of muck during construction phase should not create any adverse effect on the neighboring communities will be disposed off taking the necessary precaution for general safety and health aspects of people only in approved site with the approval of competent authority.	Proper storage and disposal measures have been implemented to prevent any adverse effects on the neighborhood, with all necessary precautions taken to ensure general safety and health.
6.	Construction spoils, including bituminous material and other Hazardous Materials should not be allow to contaminate watercourses, ground water and dump sites by following safe dumping / disposal practice as per statutory rules and norms with necessary approval of Odisha state Pollution Control Board.	Construction spoils, including bituminous materials, are stacked to prevent contamination of watercourses, groundwater, and dump sites. Groundwater quality monitoring data for the period from April 2024 to September 2024 is enclosed, confirming that all monitored values are within acceptable norms.
7.	The fuel for diesel generator sets to be used during construction phase shall be use low sulfur diesel fuel and should conform to Environment (Protection) rules 1986 prescribed for air emission and noise standard.	During the construction phase, High-Speed Diesel (HSD) is utilized for the DG sets, which fully comply with the Environment (Protection) Rules of 1986, adhering to prescribed standards for air emissions and noise levels.
8.	The Diesel required for operating DG sets shall be stored in underground tanks and if,	Diesel is sourced from nearby dispensing units, and we do not

	SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
	required, clearance from Chief Controller of Explosive shall be taken.	envisage a storage capacity that requires clearance from CCOE.
9.	Vehicles used for bringing construction materials to the sites should be in good conditions and should have a pollution check certificate, covered and conform to statutory air and noise standards and should be operated only during non-peak hours of days.	We ensure compliance by allowing only vehicles with a valid "Pollution Under Control" certificate to enter the site, with periodic checks conducted to maintain this standard.
10.	Ambient noise level should conform to residential standards both during day and night. Incremental pollution loads on ambient air and noise quality should be closely monitored during construction phase. Adequate Measures should be taken to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB/ OPCB.	To reduce noise level, movement of construction vehicles is carried out during non-peak hours and construction machinery with lesser noise and vibration parameters are used. Regular dust suppression, preventive vehicle maintenance, etc. are ensured to control of dust and noise. Noise level monitoring data has been furnished with the submitted six monthly compliance and the data is within the norms.
11.	Fly ash bricks should be used as building material in the construction as per the provisions to fly ash notification of September 1999 and as amended thereafter.	Fly ash bricks sourced from nearby areas, are being used as building material. Total 2902366 nos of fly ash bricks have been used for construction, till date.
12.	Ready mixed concrete should be used in building construction.	Ready mixed concrete is being used in building Construction. Till date 118661 cum of ready-mix concrete has been used for construction purpose.
13.	Storm water control and its reuse should be as per CGWB and BIS Standard for these applications.	Pond has been constructed for stormwater collection, with the collected water being effectively utilized for horticulture, gardening, and water sprinkling purposes
14.	Water demand during construction should be optimized by adopting best practices without compromising quality. It should be brought to the site by tanker.	During the construction phase, water conservation measures have been implemented to optimize water demand, including the use of ready-mix concrete
15.	Separation of grey and black water supplies and collection should be done by the dual plumbing line. Grey and Black water should be adequately treated separately so as to conform to the prescribed standard before recycling / reuse.	Dual plumbing systems have been installed and are fully operational in units that are currently in use.
16.	Fixtures for showers, toilet flushing and drinking water should be low flow type and	Low-flow fixtures have been implemented for showers, toilet flushing,

	SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
	restricted to requirements by the use of aerators, avoiding wastage pressure reducing devices or sensor-based controls.	and drinking water, utilizing aerators and incorporating pressure-reducing devices or sensor-based controls to minimize water wastage and meet efficiency requirements.
17.	Use of glass may be, maximum up to 40% of the total outer wall area to reduce the energy consumption and load air conditioning. If necessary, high quality double glass with special reflective coating may be used in the windows.	The use of glass has been restricted to less than 40% of the total outer wall area, ensuring compliance with the specified environmental conditions.
18.	Roof should meet the prescribed requirement as per energy conservation building Code by using appropriate thermal insulation material.	The roof has been constructed in accordance with the Energy Conservation Building Code (ECBC) norms, ensuring compliance with the prescribed energy efficiency standards.
19.	Opaque wall should meet prescribed requirement as per the energy conservation Building Code.	Opaque walls are made as per Energy Conservation Building Code.
20.	The approval of the competent authority shall be obtained for structural safety of the building due to earthquake, adequacy of firefighting equipment etc. as per National Building Code of India, 2005 including protection measure from lightning etc.	Structural safety certificate has been obtained from M/s Ramboll India Pvt. Ltd. vide letter dated 4 th December 2017.
21.	Regular Supervision of the above and the other measures for the monitoring should be in place all through the construction phase to avoid disturbances and pollution to the surrounding.	Regular monitoring and supervision are being conducted throughout the construction phase to minimize disturbances and prevent pollution to the surrounding environment.
22.	“Consent to Establish” shall be obtained from Odisha State Pollution Control Board before start of any construction work at the site.	We have obtained ‘Consent to Establish’ from Odisha State Pollution Control Board vide. Letter no. 17242, dtd. 31/10/2015.

B. OPETATION PHASE		
	SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
1.	No ground water shall be used during the operation phase. If ground water will be used during operation phase, they shall obtain permission from the water resources department.	Water requirement for the said residential complex is being met from our Tata Steel Plant for which we have agreement with Jaraka Irrigation Department, Dept. of water resource, Govt. of Odisha and water allocation letter granted by dept. of water resource, Govt. of Odisha vide water resource

B. OPETATION PHASE		
	SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
		department's letter No 5550 dtd 26.02.2024.
2.	The proponent has to install STP of 730 KLD capacity. Treated effluent from STP shall be recycled / reused to the maximum extent possible after adequate treatment. Treatment of 100% grey water by decentralized treatment should be done. Discharged of unused treated effluent shall conform to the norms and standards of State Pollution Control Board. Necessary Measures should be taken to mitigate the odour problem of STP.	STP (1000 KLD) inside the premises is in operating condition. The treated water from STP is reused in plantation, toilet flushing and horticulture activities. At present, approx. 10500 KL/Month of wastewater is being generated and is treated in STP.
3.	The Proponent shall provide a polishing pond inside the residential complex to store and reuse the treated wastewater from STP. From the Polishing Pond, the treated wastewater shall be diverted for industrial use for their own steel plant. In no case there should be any discharge of treated effluent to outside of the project premises.	Treated wastewater from STP used in plantation, toilet flushing and horticulture activities.
4.	The proponent shall take steps for protection of Ganda Nallah. There shall not be any Discharge from the residential Complex to Ganda Nallah.	There is no discharge from the residential complex to Ganda Nallah. Treated wastewater from the STP is used for plantation, toilet flushing, and horticultural activities.
5.	The STP Sludge should not be dried nor incinerated within the Project site and should be dispose of as per the norms of SPCB, Odisha.	The sludge generated from the STP is utilized as manure in the green belt development area and gardens within the premises.
6.	The STP must treat all kind of pollutions present in it and its capacity should take into account the entire load of sewage generated by the inhabitants.	The STP is capable of treating all types of pollutants present in its inlet, and its capacity has been designed to handle the entire load of sewage generated from the residential complex.
7.	The project proponent will ensure that under no circumstances, the environment is polluted due to non-functioning / under performance of sewage disposal system of the project.	Regular maintenance is carried out by a dedicated team for the smooth operation of the sewage disposal system of the project.

B. OPETATION PHASE		
	SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
8.	The solid waste generated should be properly collected and segregated. Wet garbage should be disposed off to be composted and dry / inert solid waste should be disposed through a certified agency for safe disposal. Necessary approval / permissions may be obtained from the concerned authorities. In no case it should be left in the premises untreated.	The solid waste generated is properly collected, segregated, and disposed of regularly. Wet garbage is converted into manure through Organic Waste Converters (2 units, each having an input capacity of 200 Kg/Day).
9.	Diesel power generating sets proposed as source of back-up power for lifts elevators and common area illuminating during operation phase should be of enclose type and conform to Environment (Protection) rule 1986. The height of stack of DG sets should be equal to the height of needed for the combined capacity of all proposed DG sets put together and should be more than the highest building height. Low sulfur diesel should be used. The location of the DG set may be decided in consultation with Odisha State Pollution Control Board. Care may be taken to avoid disposal of smoke / pollutants from DG sets in the residential area. Low sulfur diesel oil (LDO OR HSD) is to be used in DG sets.	To meet the emergency power requirement, three (03) acoustically enclosed D.G sets of 125 KVA capacity each are installed on-site. Adequate stack height is provided as per norms, and low-sulfur diesel is being used.
10.	Noise should be controlled to ensure that it does not exceed the prescribed standards. During night time, the noise levels measured at the boundary of the sites shall be restricted to permissible levels to comply with the prevent regulations.	Provisions have been taken to attenuate noise like: <ul style="list-style-type: none"> • movement of construction vehicles are restricted to peak hours only. • use of construction machineries with lesser noise and vibrations. Regular monitoring of noise is being conducted at daytime and nighttime. Noise Monitoring report is attached as Annexure-2.
11.	Green belt & avenue plantation of tree over the site area (minimum 20%) shall be done using native tree species / shrubs improving greenery & keeping in view aesthetics considerations in the whole complex. Professional landscape architects should be engaged to design the green layout to provide for multi-tier plantation	Green belt development has been initiated and being expedited to cover more than 20% of the total land area. To enhance the aesthetic beauty of township, development of landscapes

B. OPETATION PHASE	
SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
and green fencing all around, mitigation various environmental pollutants like dust, noise, emission etc. and pathway for joggers.	inside township area is being implemented. Green belt details as on date is given in tabular form as Annexure-3 .
12. Rain water harvesting for roof runoff and surface runoff should be implemented as per submitted plan. Before recharging the runoff, pre-treatment must be done to remove suspended matter, oil, grease and other soluble components as per the norms. Rainwater recharge should be through specified recharge pits of required numbers. The surface runoff water should be stored suitably treated and reused for landscaping. The bore-well for rainwater recharging should be kept at least 5 meter above the highest ground water table. The technology may preferably be adopted from a registered commercial firm with performance guarantee.	Roof top run off recharge structure has been made. A rainwater harvesting pond has also been made for collection of surface runoff water.
13. Weep holes in the compound walls shall be provided to ensure natural drainage of excessive rain water in the project area during the monsoon period after the harvesting operations. Care must be taken so that there is no water logging in the territory and drainage is 100%.	Weep holes are provided in compound walls for natural drainage of excessive rainwater during monsoon. Proper drainage has been provided to prevent water logging.
14. Traffic congestion near the entry and exit points from the road adjoining the proposed project site must be avoided. Traffic congestion shall be avoided inside the project site. The area earmarked for parking shall not be used for any other purpose. Alternative entry and exit must be provided to handle excess traffic and emergency situations.	Separate entry and exit points to the township have been provided with a 7-meter-wide bituminous road to avoid traffic congestion. Sufficient parking space has been provided within the premises in the area earmarked for parking.
15. A report on the energy conservation measures to energy conservation norms finalized by the Bureau of Energy Efficiency should be prepared incorporating details about building materials & technology, R & U Factors etc. and	Report on the energy conservation measures has been submitted to the SEIAA, Odisha vide our Letter No. KPO/Env/C-08/ 67/ 2017 dtd. 15. 03. 2018.

B. OPETATION PHASE	
SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
submitted to the SEIAA, Odisha in three months' time before operation/habitation.	<p>We have also obtained necessary permissions prior to operation/habitation as below:</p> <ol style="list-style-type: none"> 1. CTO from Odisha State Pollution Control Board vide Consent No 4649 dtd 30/03/2024 valid till 31.03.2028. 2. Fire Safety Certificate from Directorate General Fire Services, Home guards and civil defence, Odisha on 31.01.19, 30.11.2019, 12.01.21, 18.08.2021, 22.04.2024 and 19.09.2024. 3. Occupancy certificate from Kalinganagar Development Authority on 14.03.2019, 29.02.2020, 26.04.2022, 11.07.2022 and 06.09.2024.
The proponent shall be use at least 2-5% of non-conventional energy (solar energy) (i.e. % of total energy consumption).	Provisions for installation of Solar Panel on roof top has been made, especially for water heating and streetlights. Solar Panel having capacity 80 KWh has been installed at roof top UG tank for power supply.
Provisions of solar hot water storage / supplies at the roof of top may be made as per statutory norms of CPCB/MoEF/SPCB, Odisha.	<p>Provision has been made as per the statutory norms of CPCB, MoEF&CC, and OSPCB, Odisha.</p> <p>The installation and commissioning of solar water geysers (total capacity 29,500 L) in the buildings have been completed.</p>
Energy conservation measures like installation of CFLs/TFLs for lighting the areas outside the building should be integral part of the project design and should be in place before project commissioning. Used CFLs and TLFs should be properly collected and disposed off/ sent for recycling as per the prevailing guidelines / rules of the regulatory authority to avoid toxic contamination, use of solar panels be adopted to the maximum extent possible, especially for street lights.	<p>CFLs and TFLs are used for lighting the areas outside the building. The used CFLs and TFLs will be handed over to authorized vendors for proper disposal.</p> <p>Solar panels have been installed on the rooftop of the building for water heating.</p>

B. OPETATION PHASE	
SPECIAL CONDITIONS	STATUS AS ON 30.09.2024
The building blocks should have adequate distance between them to allow movement of fresh air and passage of natural light, air and ventilation.	The building has been constructed according to the approved drawing from the KNDA to allow the movement of fresh air and the passage of natural light, air, and ventilation between them.
The funds earmarked for the environment protection measures shall be judiciously utilized. Under no circumstances this fund shall be diverted for other purposes like annual allocation and maintenance / monitoring etc. and expenditure for this fund should be reported to the SEIAA, Odisha on regular basis.	The funds earmarked for the environment protection measures has not been diverted for any other purposes and is judiciously utilized. Till Mar'24 Rs.375.00 lakhs have been utilized for the environment protection measures.
